July 29, 2016

Dear Bill:

Re: PACE Data Book and Capitation Rates – FY 2017

The enclosed report provides a detailed description of the methodology used for calculating capitation rates for Fiscal Year 2017, effective July 1, 2016 to June 30, 2017, for the Virginia Programs of All-Inclusive Care for the Elderly (PACE) that operate as a full PACE program. The methods used for calculating these costs are consistent with Centers for Medicare and Medicaid Services requirements that the capitation rates be developed under guidelines that rates do not exceed the Fee-for-Service Equivalent Upper Payment Limit, the amount that would be paid by the Medicaid program in the absence of a PACE program, and are appropriate for the population covered by the program.

The development of these rates was overseen by Sandra Hunt, Partner, Susan Maerki, Project Manager, and Peter Davidson, Lead Actuary.

Please call us at 415/498-5365 if you have any questions regarding these capitation rates.

Very Truly Yours,

PricewaterhouseCoopers

Program of All-Inclusive Care for the Elderly Data Book and Capitation Rates Fiscal Year 2017 Prepared by PricewaterhouseCoopers LLP

July 2016

PricewaterhouseCoopers LLP (PwC) has developed the capitation rates for the Virginia Medicaid Program of All-Inclusive Care for the Elderly (PACE) for State Fiscal Year 2017 for rates effective July 1, 2016. This includes PACE rates for programs operational throughout the state. Rate setting for PACE programs is guided by regulations that limit payment to at or below the amount the Medicaid program would pay as a Fee-for-Service Equivalent (FFSE) cost in the absence of the PACE program; this is also referred to as the Upper Payment Limit (UPL). The methodology presented in this report meets the UPL guidelines and conforms to appropriate standards of practice promulgated from time to time by the Actuarial Standards Board. Rates based on UPL guidelines do not require actuarial certification.

The final rates will be established through signed contracts with the PACE plans, which will ensure that the plans concur that the rates paid will allow for contracting with sufficient numbers of providers to ensure appropriate access to health care and that they expect to remain financially sound throughout the contract period. Capitation rates are developed for a population aged 55 and over and vary by dual eligibility status (Medicaid/Medicare or Medicaid Only). The PACE rates are developed for five regions in the state and will be paid to current PACE operators as well as to any expansion sites.

Medicaid PACE rates include funding for acute care as well as the long term care and personal care services under the Elderly or Disabled with Consumer Direction (EDCD) waiver. Total payments to PACE programs include separate payments from the Medicare program for dual eligibles.

I. Background

PACE programs provide an alternative to nursing home and home and community-based services care for individuals who are certified as nursing home eligible. Originally developed through the On-Lok program in San Francisco, PACE programs are seen as an option to allow nursing home eligible individuals to remain independent by providing a single source for all needed health and social services. To be eligible for PACE, an individual must be at least 55 years of age and certified by the state as eligible for nursing home services. Enrollment in the program is voluntary.

Medicaid programs pay PACE sites a capitated fee designed to cover the full cost of all services required by PACE enrollees that would otherwise be paid through the Medicaid fee-for-service system. A PACE program is capitated for both Medicaid and Medicare covered services. Medicare's contribution to PACE costs is currently set based on the Average Adjusted Per Capita Cost (AAPCC) for the geographic area in which the PACE program operates and is risk adjusted. PACE centers typically enroll 100 to 200 individuals although there are multi-site programs with larger centers, and costs for PACE enrollees are not permitted to be used in PACE rate setting.

Our analysis includes data for most individuals eligible to participate in PACE. This includes the nursing home eligible population, both those who are residents of nursing homes, as well as those who are enrolled in Home and Community Based Care waiver program. For the base period, those in the Home and Community Based Care waiver programs were in either Medicaid Fee-for-Service or in the Medallion 3.0 managed care program. As of December 1, 2014, all people in the Elderly or Disabled with Community Direction (EDCD) Home and Community Based Services (HCBS) waiver are in Medallion 3.0 for their acute care services. All long term care and HCBS are provided through the Medicaid FFS system.

PACE UPL and capitation rate development

Payments to managed care plans for PACE enrollees are subject to federal rules. As a Medicaid program, the state must comply with federal regulations set by CMS regarding payment levels. Specifically, full PACE programs are subject to rate setting under UPL guidelines. In addition, CMS must approve the payment rates made to each plan. The PACE capitation rates shown in this report are designed to comply with the CMS requirement that PACE capitation rates be less than the UPL.

We analyzed historical fee-for-service claims for the PACE-eligible population in each region. We then made adjustments to the historical data to reflect modifications of payment arrangements under the fee-for-service program and updated the payment rates to reflect the contract period covered by these rates. We also obtained data from DMAS to incorporate the Commonwealth's administrative costs associated with providing services to the PACE eligible population into the UPL calculation. PACE capitation rates were calculated by applying a savings percentage to the UPLs. Finally, we adjusted the rates to reflect changes in the average risk of the PACE eligible population and the expected mix of nursing home and non-nursing home service delivery during the contract period.

II. Data sources

PwC obtained detailed historical fee-for-service claims and eligibility data from the Department of Medical Assistance Services (DMAS) for services incurred and months of enrollment during State Fiscal Years 2014 through 2015 with claims paid through December 2015. The claims in the historical database include Medicaid

paid amounts net of any third party insurance payments, which are primarily Medicare payments, and the amounts for which patients are personally responsible for the nursing facility and personal care services. Fee-for-service data are used to develop PACE UPLs and capitation rates because PACE rate setting guidelines do not permit direct use of encounter data from the contracting PACE plans.

The work in this report builds on analyses performed in developing FY 2017 capitation rates for the Medallion 3.0 program. In the Medallion 3.0 program, special adjustments are made to the historical data to reflect changes in payment arrangements due to other programmatic and legislative adjustments. Where applicable, these same adjustment methodology and factors are used in the development of the PACE rates.

The claims and eligibility information used in this report includes data for Medicaid recipients who are potentially eligible for the PACE program based on their age, eligibility category, and eligibility for nursing home services. Members eligible for PACE are identified by an indicator on each eligibility record that signifies that the member is in a nursing facility or a Home and Community Based Care waiver, primarily those in the Elderly or Disabled with Consumer Direction (EDCD) waiver. There is one exception to the potentially eligible for PACE criteria. We excluded PACE eligibles who enrolled in the Commonwealth Coordinated Care (CCC) Duals Financial Alignment Demonstration and met the criteria for Nursing Home Eligible–Institution or Nursing Home Eligible–Waiver. Once these eligibles are enrolled in CCC, the acute and LTC service costs are the responsibility of the CCC health plan. Because voluntary enrollment in CCC began March 2014 and the first auto-assignment was not until July 2014, the CCC exclusion for the Dual Eligible PACE population had some impact on the historical base data, including the evaluation of trend factors and changes in risk mix.

All claims and eligibility data for members who are not eligible for the PACE program or are unlikely to enroll were excluded from the historical data used in these calculations. Members who incurred services indicated as "Nursing Facility/Mental Retardation" are not eligible to enroll in PACE, although they would otherwise qualify for PACE based on this indicator. A category of members who would qualify for but are unlikely to enroll in PACE are those who receive a high level of special and complex services, such as ventilator assistance. All claims and eligibility periods for these groups were removed from the database prior to the calculations shown in this report.

Additional costs for PACE eligibles were identified by matching to three other data sets. These are 1) mental and behavioral health encounter data for services managed by Magellan under an administrative services arrangement that began November 1, 2013, 2) FFS data for services associated with consumer-directed personal care services received under the EDCD waiver and 3) FFS data for the Acute and Long Term Care (ALTC) population enrolled in managed care organizations who continue to receive acute services from their health plan and receive LTC services through Medicaid FFS. The costs for the ALTC population are added to the base for the non-dual PACE eligibles.

Claims and eligibility for retroactive periods (claims incurred prior to a determination of Medicaid eligibility that are ultimately paid by Medicaid) were also removed from the data before summarization because plans are not responsible for retroactive periods of coverage. Claims are limited to those services covered in the approved state plan.

The resulting historical claims and eligibility data were tabulated by service category for dual and non-dual eligibility status and region and are shown in Exhibits 1a - 1b, which are generally referred to as the "Data Book". The regional data provide an adequate basis for rate setting and no data smoothing techniques are applied. These exhibits in 1a – 1b show unadjusted historical data and are the basis of all future calculations described here. These exhibits show, for informational purposes:

- Member months for Fiscal Years 2014 and 2015,

- Medicaid payment amounts for the combined years,
- Patient payment amounts for the combined years[1],
- Costs per member per month (PMPM) for the combined years (a combination of Medicaid and patient payment amounts),
- Unadjusted units of service for Fiscal Years 2014 and 2015 (a definition of "units" for each category of service is provided in Exhibit 6),
- Annual units/1,000 members for the combined years, calculated as the total units of service divided by the appropriate member months, multiplied by 1,000, multiplied by 12, and
- Cost per unit of service.

III. UPL calculations

The UPLs for Fiscal Year 2017 are based on the historical data shown in Exhibits 1a – 1b adjusted to reflect changes in payment rates and covered services. Each of the adjustments to the historical data is described in the following section. The adjustments are applied to the historical data and the resulting UPLs are calculated in Exhibits 4a – 4b.

The steps used for calculating the UPLs are as follows:

1. The historical data for each Medicare eligibility status and region are brought forward to Exhibits 4a and 4b from the corresponding cell in Exhibits 1a and 1b.[2] This information serves as the starting point for the UPL calculation.
2. A number of changes in covered services and payment levels have been mandated by the Legislature or by changes to the Medicaid State Plan. Several of these adjustments were described in the FY 2017 Medallion 3.0 report and applied to the PACE calculations. Additional adjustments that apply to the PACE eligible group are incorporated into these calculations. These adjustments are described in greater detail in Section IV.
3. The claims data are trended to the FY 2017 contract period; these trend adjustments are described in Section V. The resulting claims are shown in Exhibits 4a and 4b under the column "Completed & Trended Claims".
4. The adjusted claims from Step 3 are divided by the count of member months for each rate cell (from Exhibits 1a and 1b) to arrive at preliminary PMPM costs by service category. These PMPM costs are summarized by dual eligibility status and region.
5. The DMAS FFS administrative cost is added.
6. Finally, a savings percentage is applied to the PACE UPLs to produce the PACE capitation rates, ensuring that the capitation rates paid to PACE plans are less than the expected FFS cost in the absence of the PACE program.

[1] Patient payment amounts are primarily for nursing home and personal care services.
[2] Patient payment amounts for adult day care, consumer directed, nursing home, and personal care services are carried forward to the capitation rate calculations in Exhibits 4a and 4b.

IV. Programmatic and legislative adjustments

Prescription drug adjustment

The PACE rate-setting checklist requires that UPLs be developed based on the FFS equivalent cost. The prescription drug adjustment was based upon a combination of analysis of the DMAS FFS pharmacy payments, including rebate amounts, unit cost, utilization rates, dispensing fees, and application of co-payments.

For the Dual Demonstration population, the majority of prescriptions are covered under the Medicare Part D drug benefit. The Virginia Medicaid program continues to cover the prescription drugs for which federal matching funds remain available but which are specifically excluded by law from Medicare Part D and to cover specific DMAS approved over-the-counter (OTC) drugs, which are also excluded from Part D. For the Medicare Part B covered drugs, DMAS continues to pay for coinsurance and deductibles. Prescription drug costs for the non-dual population are covered by the Medicaid program and there is no adjustment to those costs in Exhibit 1b.

The DMAS dispensing fee during the data period of FY 2014 and FY 2015 was $3.75 per script. Dispensing fees during the base period were reported as $3.75 or as $0.00 because no dispensing fee is paid if the same prescription is filled more than one time in a month. Therefore the data period dispensing fee average is less than $3.75. The resulting FY 2017 average dispensing fees are $3.20 for duals and $3.17 for the non-dual population.

DMAS Medicaid prescription co-payments on brand name drugs are set at $3.00 and the co-payment for generic drugs is $1.00. As mandated by Federal law, co-payments are not imposed on recipients in nursing homes or in community based waivers, although a small amount of co-payment were reported in the FFS data. Because PACE members are certified as nursing home eligible, we have not calculated or applied any further co-payment adjustment.

The DMAS discounts, rebates, and dispensing fees, are applied for the non-dual population, but different adjustments are applied for the dual eligible population. The prescription drugs covered by Medicaid for the dual eligible population contain a different mix of drugs than that used by the non-dual population; the dual mix includes a higher proportion of over-the-counter (OTC) and specialized drugs that do not receive the same discounts and rebates as other Medicaid covered drugs. This mix was considered in calculating the total FFS rebate percentage for the PACE-eligible dual population. Based on analysis of the more recent non-dual claims, we kept the same level of assumed savings from future expected improvements in the Brand-Generic mix.

These adjustments are calculated in Exhibit 2a and applied to the total historical claims data in Exhibits 4a and 4b under the column labeled “Policy and Program Adjustments”.

Adult day care fee adjustment

Effective July 1, 2016, there is a 2.5% rate Adult Day Care rate increases across all regions. The calculation is shown in Exhibit 2b, and the adjustment is applied in Exhibits 4a and 4b under the column labeled “Policy and Program Adjustments”.

Hospital inpatient adjustment

The hospital capital percentage averaged 8.9% during the FY 2014- FY 2015 base period. The percentage was decreased to 8.5% in FY 2016 and is expected to remain at that value in FY 2017.

There are no unit cost adjustments for either FY 2015 or FY 2016. The Virginia General Assembly authorized a unit cost adjustment for FY 2017 equal to half the regulatory inflation of 2.1%, a value of 1.05%.

Hospital inpatient reimbursements rates are being rebased for FY 2017. For inpatient medical/surgical, the FFS rebasing is a negative adjustment of 7.25%. For inpatient psychiatric in acute care hospitals, the FFS rebasing is a positive adjustment of 27.00%.

For inpatient medical/surgical, the total adjustment is a negative 5.7%. For inpatient psychiatric in acute care hospitals, the total adjustment is a positive 25.7%. The inpatient psychiatric factor is applied to mental health claims.

These adjustment factors are shown in Exhibit 2c and applied to all hospital inpatient service categories in Exhibits 4a and 4b under the column labeled "Policy and Program Adjustments".

Outpatient hospital adjustment

There are three adjustments to outpatient hospital for FY 2017. DMAS used to pay outpatient hospital as a percent of cost and rate setting used the outpatient hospital trend based on the historical trend. As of January 1, 2014, DMAS FFS started reimbursing outpatient hospital using Enhanced Ambulatory Patient Groups (EAPGs). Inflation adjustments will now be applied to outpatient hospital rates in the same manner as inpatient hospital. FY 2017 is the first year that outpatient hospital inflation has been modified. Outpatient hospital rates are going to be adjusted by 50% of inflation, a 1.05% unit cost increase.

The outpatient hospital adjustment is structured similarly to the inpatient hospital adjustment. There also is a small FFS outpatient hospital rebasing adjustment of 0.1%.

These adjustment factors are shown in Exhibit 2d and applied to all hospital outpatient service categories in Exhibits 4a and 4b under the column labelled "Policy and Program Adjustments".

Nursing facility adjustment

Effective FY 2015, DMAS implemented a fully prospective nursing facility payment. The prospective per diem amount includes adjustments for cost settlement, unit cost inflation, capital and operating cost factors, occupancy requirement changes, and any policy changes. This nursing facility reimbursement change produced a substantial increase in the unit cost amount in the claims run out beginning July 2015 compared to the FY 2014 period.

The nursing facility adjustment is revised in Exhibit 2d. The nursing facility adjustment is a unit cost adjustment that increases the FY 2014 base period nursing facility unit cost to the more recent nursing facility prospective unit cost. Based on a review of the paid claims data, the prospective payment conversion is not fully reflected in the first months of FY 2015. The adjustment of 10.1% is calculated as the ratio of the 6 month rolling average of the prospective payment unit cost using the time period January 2015 to November 2015, which is the most current relatively complete data available, to the base data in FY 2014.

This adjustment is applied to the FY 2014 nursing facility paid claims. A 0.9% nursing facility fee increase was applied to the full FY 2014 – FY 2015 base period to project the costs to FY 2017.

The calculation is shown in Exhibit 2e, and the positive 6.1% adjustment is applied in Exhibits 4a to 4c under the column labelled "Policy and Program Adjustments". These adjustments are applied in lieu of a trend adjustment to nursing facility unit costs.

DME Fees adjustment

Effective FY 2015, the approved budget reduced Medicaid fees for the DME products covered under the Medicare competitive bid program to a level based on the average of the Medicare competitive bid prices in the three areas of the state participating in the competitive bid program. This was estimated to result in $4.9 million in total savings. DMAS estimated that the Medicare competitive bid rates for these services were 33% lower than the FFS Medicaid rates for the services. DMAS provided a list of DME HCPCS codes subject to the Medicare competitive bid program and the average Medicare bid payment rate for the three areas in Virginia that participate in the program. This information was used to determine the proportion of DME claims subject to the fee reduction and the average savings percentage based on the mix of DME codes subject to the savings. Overall, 8% of FY 2014 PACE eligible DME claims dollars were for codes subject to the reduction, and savings on this subset was 33.5%. When that savings is applied to the proportion of DME costs, the overall savings is 1.5%.

The calculation is shown in Exhibit 2f, and the adjustment is applied in Exhibits 4a and 4b under the column labeled “Policy and Program Adjustments”.

Incontinence Supplies adjustment

DMAS solicited bids for the cost of high volume incontinence supplies, primarily adult diapers and protection pads. When compared to current DMAS payment rates, the bid prices were estimated to produce nearly $2.7 million in savings, or 33% of the cost of the mix of those supplies. These reductions were implemented effective July 1. 2015 for FY 2016. DMAS provided a list of DME incontinence supplies HCPCS codes subject to the bid program and the bid rate for the items. These were used to calculate the dollar cost savings per unit and a savings percentage per affected DME code. This information was applied to the historical claims to determine the proportion of DME claims subject to the incontinence supplies fee reduction and the average savings percentage based on the mix of DME codes subject to the savings. Overall, about 64.5% of duals and 6.8% of non-duals DME claims costs were for incontinence supply codes subject to the reduction. Savings on this subset are 28.8% and 29.1%, respectively for dual and non-dual eligibles.

This results in adjustment factor reductions of 18.6% and 2.0% as shown in Exhibit 2g. The adjustment is added in Exhibits 4a to 4b under the column labeled “Policy and Program Adjustments.”

Lab Fees adjustment

The FY 2015 final budget included a 12% reduction to lab fees ($2.1 million in FFS savings). The 12% reduction was chosen to match the payment rates already in place for the Medallion 3.0 plans. Therefore, this adjustment is applied to any rates based on FFS claims data, including the FY 2014 claims for the PACE eligible population. It is shown in Exhibit 2h and added in Exhibit 4a and 4c under the column labeled “Policy and Program Adjustments”.

Hepatitis C treatment adjustment

The Hepatitis C Treatment adjustment of 6.7% uses the value calculated for the ABAD population as described in the FY 2017 Medallion 3.0 report. The Dual population will receive Hepatitis C treatment and drug therapy through their Medicare primary coverage. Therefore, the Hepatitis C Treatment adjustment value is applied only to the non-Dual population rate development.

It is shown in Exhibit 2i and added in Exhibit 4a and 4c under the column labeled “Policy and Program Adjustments”.

ER Triage adjustment

The 2015 General Assembly final Budget conference report eliminated emergency room (ER) triage for physician services effective for FY 2016. Prior DMAS FFS policy applied ER Triage review only to Level III ER claims. If a case was determined to have insufficient documentation of medical necessity for an emergency, DMAS could reduce the physician payment to an all-inclusive rate of $22.06 for the code 99283 instead of paying the physician fee of $43.57 plus ancillaries. Eliminating the ER Triage review increases the Level III ER payment to physicians by the difference in the 99283 physician fee plus the average amount of ancillary services billed on those claims.

The ER Triage adjustment reflects the additional amount estimated to cover the cost of discontinuing Level III Triage review and paying such claims at the average fee for CPT code 99283, plus the average of the ancillary payments that are associated with the claim. The historical base FFS data was analyzed in order to identify the number of Level III ER claims paid at the ER Triage level and was re-priced to reflect DMAS FFS average cost of a Level III professional claim paid in full at $43.57. For Level III claims for non-dual eligibles, this is approximately $11,000 based on the FY 2014 and FY 2015 number of claims.

The calculation of the additional cost is presented in Exhibit 2j. The adjustment is added in Exhibits 4a to 4b under the column labeled “Policy and Program Adjustments.”

RBRVS rebasing adjustment

Each year DMAS adjusts physician rates consistent with the Medicare RBRVS update in a budget neutral manner based on funding. Up until recently, the update was based solely on DMAS FFS data. Managed care plans reported that the rebasing is not cost neutral to their operations and that the impact on them varies. Therefore, the analysis was revised and the DMAS update now uses both FFS and MCO data. The FY 2017 DMAS analysis used FFS and the MCO data, as repriced to the DMAS physician fee schedule. Claims covered all professional providers, including physicians, nurse practitioners, psychologists, therapists, opticians, and federally qualified health centers and the full range of CPT codes from 10000 to 99499. The new physician rates for FY17 result in a 0.6% increase to the FFS unit costs. Other codes, such as J codes for drugs administered in an office setting and anesthesia-related codes that are grouped in the professional service categories, are excluded from the adjustment.

The calculation of the RBRVS adjustment is shown in Exhibit 2k. The adjustment is added in Exhibits 4a to 4b under the column labeled “Policy and Program Adjustments.”

Personal Care and Respite Care adjustment

The 2015 Virginia Appropriation Act increases personal care and respite care rates by 2% effective July 1, 2015. Under the contract, the plans are required to pay at least the Medicaid personal care and respite care rates. As a result, this FY 2016 effective fee change applies to relevant consumer directed services and personal care services claims.

Effective July 1, 2016, there is an additional 2% rate increase to personal care and respite care rates. This is applied to the full base period.

Codes for personal care and respite care services were also found in the Physician-OP Mental Health category. Those claims were added to the personal care service line for this adjustment. This results in a cumulative

positive adjustment of 4.0% to consumer directed services and a positive adjustment of 4.7% to personal care services.

The calculation of the Personal Care and Respite Care adjustment is shown in Exhibit 2l. The adjustment is added in Exhibits 4a to 4b under the column labeled "Policy and Program Adjustments."

Home Health and Rehab adjustment

Effective July 1, 2016, there is an increase to the fee schedule for home health care and outpatient rehabilitation agencies. The inflation adjustments are a 1.7% to home health care and a 2.1% to outpatient rehabilitative agency. DMAS provided a list of outpatient rehabilitative procedure codes and provider class subject to the fee schedule inflation adjustment. The identified claims are under physician – other practitioner service line.

The calculation of the Home Health and Rehab adjustment is shown in Exhibit 2m. The adjustment is added in Exhibits 4a to 4b under the column labeled "Policy and Program Adjustments."

Non-emergency transportation adjustment

Non-emergency transportation (NET) services were contracted to a broker during the historical data period under a capitated payment methodology and services are not captured in the DMAS FFS claims. The non-emergency transportation adjustment is based on the service cost component (including the administrative cost) of the accepted bid for the ABAD nursing home population, a statewide rate at $82.46 PMPM for FY 2017 effective January 2016. The PMPM value is shown in Exhibit 2n, and the adjustment is applied in the total UPL column in Exhibits 4a and 4b.

Other adjustments

DMAS Administrative Cost Adjustment

The CMS regulations permit administrative costs directly related to the provision of Medicaid State Plan approved services to be incorporated into the rate-setting process. DMAS estimates that its administrative costs to provide service to the PACE eligible population are 2.0%. This percentage is added to the UPL calculations and to the PACE per capita cost rate development.

This adjustment is shown in Exhibit 2o. This adjustment factor is applied in the final step of the per capita cost calculations at the bottom of each rate cell worksheet in Exhibits 4a and 4b.

UPL Savings Adjustment

An adjustment is made to reflect savings relative to the FFS system as required under PACE rate setting rules.

These PACE capitation rates reflect 3.5% savings relative to the projected UPL. The savings adjustment was not applied to prescription drugs or non-emergency transportation[3]. A small brand-generic improvement factor for prescription drugs for the non-dual population is incorporated in the Prescription Drug Adjustment described earlier and the non-emergency transportation adjustment is added as the contracted FY 2017 value.

[3] The small amount of non-dual Medicare crossover services is also exempt from the managed care utilization adjustment.

The UPL savings adjustment factor is shown in Exhibit 2o and is applied in Exhibits 4a and 4b under the column labeled "UPL Savings Adjustment".

V. Trend adjustments

The data used for the IBNR and trend calculations reflect experience for the period FY 2013 through FY 2015. Data for FY 2014 to FY 2015 is used to evaluate the base period trend and an additional year of data, FY 2013 through FY 2015, is used to develop contract period projected trend.

The data must be adjusted to reflect the contract period of FY 2017 through the application of trend rates that reflect changes in payment levels and utilization rates between the data period and the contract period. In addition, the claims data are not 100% "complete" in that some cost information is not available in the claims databases provided. Incomplete data result from the time lag between when services are provided and claims are fully paid. The amount of incomplete claims is referred to as Incurred but Not Reported (IBNR) and can be estimated through actuarial models.

Trend and IBNR adjustment factors were developed using historical Virginia Medicaid FFS expenditures for FY 2013 to FY 2015 and are calculated separately for the dual and the non-dual populations. We used paid claims information with run out through December 2015 and took into consideration the actual experience and information from DMAS on projected utilization and fee increases in budget estimates.

The historical data were evaluated using a PwC model that estimates IBNR amounts using a variety of actuarially accepted methods and trend using a least-squares regression methodology. Trend and IBNR factors were developed separately for the following service categories: Inpatient Medical/Surgical, Inpatient Psych, Outpatient Hospital, Practitioner, Prescription Drug, Personal Care, Consumer Directed Services, and Other. The Other category includes Lab/X-Ray services, DME and transportation. IBNR factors and trend rates for the Medicare crossover service categories for the dual population, which are combined across all services, and long term care services, including Nursing Facility, Adult Day Care, and Personal Care were developed from analysis of the historical data.

Annual trend rates are applied to move the historical data from the midpoint of the data period (7/1/2014) to the midpoint of the contract period (1/1/2017), or two and a half years (30 months). Each category of service in Exhibits 3a and 3b shows a Data Period and a Contract Period trend. Data Period trends are applied from the midpoint of the data period to the end of the data period, and were developed from the historical regression analyses and budget work described above. The Contract Period trends are applied from the end of the data period to the midpoint of the contract period. For services with fee increases reflected in the adjustments in 2a through 2m the contract period trend is in conjunction with the planned cost per unit increase.

Trend rates represent a combination of cost and utilization increases over time. The trend rates used reflect utilization and standard rate increases when additional legislative cost increases or decreases have been applied and represent PMPM increases otherwise.

No trend adjustments were applied to nursing home. Unit cost changes for nursing home were applied because the Nursing facility adjustment, described above, already fully reflects changes in costs to FY 2017. Nursing home utilization has been observed to decline consistently during the base period. This negative trend is attributed to a consistent shift in mix between enrollees who receive services in nursing homes and those who receive services in

the community. Rather than apply this shift as a trend adjustment, we developed and applied a nursing home mix adjustment as described in a later section.

In addition, the Dual contract period pharmacy trend was adjusted to remove drugs that are now covered under Medicare Part D. Effective January 1, 2013, Medicare Part D began to cover benzodiazepines with no restrictions and barbiturates when used in the treatment of epilepsy, cancer or chronic mental disorders and therefore they are no longer paid by Virginia Medicaid. This affects the first half of FY 2013, the year prior to the base data, which is used to develop the contract period trend.

Adjustments to the historical data before the analysis of trend were applied to both the dual and the non-dual trend and are presented in the following table.

Table 1
Summary of Adjustments to Trend

Service	Time Period	Adjustment
Personal Care and Consumer Directed	Jul 2015 – Dec 2015	0.979
Inpatient - Med/Surg	Jul 2013 – Dec 2015	0.960
Inpatient – Psych	Jul 2013 – Dec 2015	1.071
Adult Day Care	Jul 2013 - Dec 2015	0.834
Other	Jul 2013 - Jun 2015	Dual 1.023 Non-Dual 1.003
	Jul 2015 – Dec 2015	Dual 1.199 Non-Dual 1.032

The evaluation of nursing home (including Medicare crossover), adult day care, consumer directed services, and personal care services trend included both DMAS and patient payment amounts. Consumer Direction and Personal Care were evaluated as independent combined service. The total trend rates shown in Exhibits 3a and 3b represent the combination of Data Period and Contract Period trends, and are calculated using compound interest calculations. For these rates, a number of the dual and non-dual data period trend are negative. Contract period service category trend that is negative in the models is set to 0.0%. The result is that overall Medicaid data period trend is negative or flat and the contract period trend is slightly positive for both dual and non-dual. These trend/IBNR factors are applied to the historical data in Exhibits 4a and 4b by applicable service category in Exhibits 4a and 4b.

VI. PACE capitation rates

The UPL savings adjustment is applied to the UPL values to produce the unadjusted PACE capitation rates shown in Exhibit 5a. Averages are weighted by the distribution of eligible member months for the January 2016. Overall, the PACE rates are approximately 3.4% below the Upper Payment Limit, and therefore meet CMS PACE rate setting checklist requirements.

Analysis of the PACE eligible population by region indicates variation in the relative proportion of the eligible population that is in nursing homes and the proportion that is supported by home and community based services.

The percentage of the PACE eligible population in nursing homes has been decreasing over time. It was 62.1% of Dual and 46.7% of Non-Dual in the FY 2010 to FY 2011 base period used for the FY 2013 PACE rates. For base period of FY 2014 to FY 2015 used in FY 2017 PACE rate setting, 52.2% of the dual eligible population and 37.5% of the non-dual population was in nursing homes.

Recent data indicates a continuing decline in the proportion of PACE eligibles in nursing facilities. As of January 2016, the proportion of the Dual PACE eligibles in nursing homes was 46.0% and the proportion of non-Dual eligibles in nursing homes was 33.4%. At the same time, the proportion of PACE eligibles using Home and community based services increased. The decrease in the proportion in nursing home is shown in Table 2.

Table 2
% in Nursing Home
Based upon Distribution of Historical PACE MM

Rate Period	Duals	% Change	Non-Duals	% Change
FY 2013	62.1%		46.7%	
FY 2014	59.0%	-5.0%	45.8%	-1.9%
FY 2015	56.5%	-4.2%	42.5%	-7.2%
FY 2016	54.5%	-3.5%	40.0%	-5.9%
FY 2017	52.2%	-4.2%	37.5%	-6.3%
Snapshot Jan 2016*	46.0%	-11.9%	33.4%	-10.9%
Cumulative FY13-FY17		-15.9%		-4.2%
CAGR FY13-FY17		-4.2%		-5.3%

* Change includes impact of CCC Duals implementation

To adjust for the differences in nursing home mix between the base data period and the contract period, we developed a Nursing Home Mix Factors for each region. The January 2016 mix was used to estimate the proportion of PACE eligibles in nursing homes for the FY 2017 rate period.

Exhibit 5b presents the Nursing Home vs Non Nursing Home Mix Factor. This is a different methodology from past PACE rate development that used the Statewide Nursing Home vs Non Nursing Home Mix Factor that was the historical weighted average PACE eligibles during the base data periods. Those Statewide percent in nursing home are the values that are shown in Table 2. The revised factors use the regional average for a more recent period, the "snapshot" month of January 2016. Although all regions have shown a pattern of decreasing use of nursing facilities, the change was made to reflect the different mix of nursing home and HCBS resources in each region.

The FY 2014 – FY 2015 historical PMPM base costs are shown in the first three columns of the revised Exhibit 5b. The nursing home percentage for the historical period is shown for information purposes and then the percentage in nursing home for January 2016. The Nursing Home vs Non Nursing Home Mix Factor is calculated by reweighting the historical PMPMs by the percentage of eligibles in nursing home and non-nursing home by region in the snapshot month and comparing that weighted average PMPM to the average over the base period.

DMAS began phase-in of Commonwealth Coordinated Care, a Dual Demonstration managed care program in July 2014, coinciding with the start of the second year of the FY 2017 base period. Over a number of months,

approximately 20% of the Dual PACE eligibles in nursing homes and with home and community based service waivers were moved to the CCC managed care plans.

An analysis of average cost PMPM pre and post CCC phase in by region indicated that PACE Dual eligibles who were in nursing homes and who opt-out of CCC and therefore remained in FFS were more expensive than the average cost PMPM of the PACE Dual eligibles in nursing homes prior to the phase in. PACE Dual eligibles who were in the EDCD waiver were either similar or only slightly higher cost PMPM after the CCC Dual phase-in. The Post CCC Dual risk adjustment factor was developed by taking the ratio of the pre and post CCC Dual phase in PMPM and pro-rating for the months in the base period prior to CCC Dual phase in for the region. Exhibit 5c presents the dual eligible risk adjustment factor.

Exhibit 5d applies the adjustment factors in Exhibits 5b and 5c to the historical base and the UPL rates in Exhibit 5a and weights them by the January 2016 PACE eligible member month distribution. The FY 2017 PACE adjusted capitation rates are 3.4% lower than the UPL.

A comparison of FY 2017 PACE rates to FY 2016 rates in Exhibit 5e shows a 3.80% overall increase in the dual PACE capitation rates and a 2.02% decrease in the non-dual PACE capitation rates, resulting in an overall increase of 2.82%. The composite year-to-year change by region ranges from a 12.9% increase to a -1.3% decrease. The regional percentage difference is primarily driven by the change to use of the regional proportion of nursing home percentage rather than the statewide average proportion of nursing home.

When the regional rates are weighted by the January 2016 PACE enrollee population, there is a 3.30% increase in the dual population rates, a 1.26% decrease in the non-dual PACE rates, and an overall weighted year to year increase of 2.77%.

PACE programs will also receive a capitation payment from the federal government for the Medicare component of services for dual eligibles.

Months of Trend Applied:				12	12	12	18	

Notes:

Trend rates are calculated based on regression studies of historical Virginia fee-for-service data. Contract period trend for Nursing Home, Adult Day Care, and Personal Care categories also considers DMAS budget projections.

Trend rates have been calculated separately for the broad service categories shown above.

Regressions were based on PMPM costs. Trends for Long Term Care Services were developed from historical data and DMAS budget information.

The following categories include patient payments: Nursing Facility, Adult Day Care, Personal Care, Consumer Directed Services, and Medicare Crossover - Nursing Facility.

Data period trend are applied from the midpoint of the data period to the end of the data period using compound interest calculations. Contract period trends are applied from the end of the data period to the midpoint of the contract period using compound interest.

Total Trend & IBNR = [(1 + Data Period Trend) ^ (months/12) * (1+ Contract Period Utilization Trend) ^ (months/12) * (1 + IBNR Adjustment)]

*Weighted average is calculated using a distribution by Service Type, before Trend (Adjusted FY 2014-2015 Claims)
