

PRSS Enrollment Rules for Early Intervention, Federally Qualified Health Centers (FQHCs), Rural Health Centers (RHCs), Community Services Boards (CSBs), Ordering, Referring, and Prescribing (ORP) providers, and Out of State Providers

I. Early Intervention Providers

How Early Intervention providers enroll in PRSS

Early Intervention (EI) providers, including local lead agencies (LLA) or EI specialists (i.e., EI PT, OT, and Speech therapy providers), are enrolled in PRSS under the enrollment type of “individual” or “Facility/Organization.” Both enrollment types can bill for EI services under the NPI that is enrolled.

EI therapy service providers enroll as the provider type “Early Intervention,” and not as Physical, Occupational, or Speech Therapists in PRSS.

The PRSS is not configured to allow EI Service providers to enroll as an “Individual within a group.” EI provider types cannot be affiliated to a group in PRSS. The only option available for EI provider enrollment is “Individual or Facility/Organization”.

Physical, Occupational, or Speech Therapists are also allowed to enroll in PRSS for Cure’s Act compliance in MCO networks *but not for EI services*.

Rules if an NPI is listed on the EI claim

- If an NPI is listed on any claim, then the NPI must be enrolled in PRSS, or the claim will be denied. This rule is required for Cure’s Act compliance.
- Where the local lead agency bills for all services, the EI specialists, including PT, OT, and Speech providers, are not required to be listed on the claim or enrolled in PRSS.
- Where the EI specialist, including EI PT, OT, and Speech providers bill separately from the LLA for the service, the EI specialist must be enrolled in PRSS for the claim to pay.
- Providers enrolled in PRSS are either enrolled as individual billing EI providers or as EI Local Lead Agency (LLA) provider organizations. They bill with their NPI as the billing and servicing NPI.

II. FQHCs, RHCs, and CSBs

FQHCs, RHCs, and CSBs are enrolled in PRSS as enrollment type “Facility/ Organization.” They can bill for all their facility/organization services under the facility/organization NPI. Their servicing providers are not required to enroll in PRSS or to be entered on the FFS claim to be paid for FQHC, RHC, or CSB facility/organization services.

III. FQHC, RHC, and CSB Ordering Referring and Prescribing (ORP) Practitioners

Like all ordering, referring, and prescribing (ORP) practitioners, FQHC, RHC, and CSB ORP practitioners must enroll in PRSS individually for any services that they order, refer, or prescribe to be paid under Medicaid FFS or managed care and their ORP NPI number must be listed on the claim.

IV. Out of State Providers

- Fee-For-Service - If a provider is outside of the 50-mile border of Virginia and considered an out-of-state provider then a claim or supporting documentation is required to necessitate their enrollment in the fee-for-service network.
- Managed Care - This 50-mile border rule does not apply to providers enrolling only in a MCO Plan. No claims or additional documentation is required to be attached.

Note: If an NPI is listed on any claim, then the NPI must be enrolled in PRSS, or the claim will be denied. This rule is required for Cure’s Act compliance.
