ORACLE DATABASE ADMINISTRATOR

Role Title: Information Technology Specialist III

Position: #00899

Pay Band 6, Level I Hiring Range: \$55,672 - \$80,000

Closing Date: December 14, 2015

Information Management Division seeks technology professional as Oracle Database Administrator for the Information Management division in the design, development, maintenance of Oracle database and e-Business Suite applications and the multiple components within the Oracle technology stack. This position is responsible for all the aspects of the mission critical production and non-production database environments, and works closely with the project manager, IM project management staff, other members of the project team, and stakeholders. Applicants must have considerable knowledge of RDBMS principles, Oracle database related best practices, and the software development life cycle. Requires hands-on experience implementing, upgrading and tuning Oracle EBS in production environment throughout all stages of the lifecycle, and the Enterprise Manager Grid control. Requires working knowledge of building/maintaining Oracle databases for production and non-production environments. Must have working knowledge of support of Oracle application database admin, including Oracle 11g and Oracle EBS 11i, R12. Must have hands-on experience in the implementation, upgrade and tuning of Oracle EBS in production environment throughout all stages of the lifecycle and Enterprise Manager grid control. Requires experience in Backup and recovery practices, including RMAN, and experience providing end to end DBA support in system and application domain. Must have demonstrated experience monitoring databases and performing tuning enhancements to optimize the performance of Oracle systems running on the Windows/Linux operating system; performing database restore and recovery in the event of an outage; and establishing best practices, policies and procedures. Proven ability to implement and maintain proactive database monitoring for space issues, database locking, performance issues, and other key metrics. Requires experience in Oracle PL/SQL, shell scripting, and managing APEX applications. Must be able to plan and complete assigned work on time, manage multiple projects with dynamic priorities, and ability to work in a fast paced environment with occasional non-business hours (evenings and weekends) flexibility. Must have demonstrated ability to quickly adapt to new technical environments (multiple disciplines); manage multiple projects with dynamic priorities, and be equally adept at highly technical and strategic issues/projects. Medicaid Management Information System (MMIS) experience is preferred. Bachelor's degree with a major in management information systems, computer sciences, business administration, accounting, engineering, mathematics or a closely related field preferred; equivalent level of experience may substitute for degree.

ONLINE STATE APPLICATION REQUIRED

Resumes will not substitute for state applications. DMAS will only accept online applications submitted through the RMS by 11:59 p.m. on the referenced closing date. Faxed, emailed, or hand delivered applications or resumes will

not be accepted and resumes will not substitute for a complete state application. Applications must include complete work history, including periods of unemployment if applicable. Consideration for an interview is based solely on the information within the application.
