

## CM Manage Registry

Manage Registry		
Item	Details	VA “As-Is” Details
<b>Description</b>	A medical “registry” for the purposes of MITA is tool that is used to consolidate related records from multiple sources into one comprehensive data store. This data store may or may not be resident within the Medicaid information system. The <b>Manage Registry</b> business process receives requests for information and prepares updates for a specific registry (e.g., immunizations, cancer, etc.) and responds to inquiries with response data set.	<p><b>2010 MITA:</b> The Cancer and Immunization registry at VDH does not fit for claims and eligibility data.</p> <p><b>2007 MITA:</b> VA’s registries are in the form of stand alone repositories of claims, encounter and eligibility data.</p>
<b>Trigger Event</b>	Receipt of inquiry data set Receipt of data to update registry	<p><b>2010 MITA:</b> The Cancer, HIV/AIDS or Vital Statistics registries do not delete records from their registry/databases.</p> <p><b>2007 MITA:</b> VA does not delete records from its registry/database.</p>
<b>Result</b>	Response to inquiry data set is prepared and sent Update data set is prepared Response to update request is sent	Informal registries are also created by complex SAS queries against established registries of data as previously mentioned in the “As-Is” description.
<b>Business Process Steps</b>	Start: Receive update request 1. Receive data 2. Validate data 3. Apply applicable updates to the registry 4. Prepare reply data set End: Log reply sent	<p><b>2010 MITA:</b> 2. Validate Data should also have a step representing what occurs when ‘Invalid Data’ is found on the database. The ‘Invalid Data’ business step should initiate a manual process to correct the core system of record.</p> <p><b>2007 MITA:</b> 1. VA includes the receipt of claims, encounter and eligibility data in this initial step.</p>
<b>Shared Data</b>	Registry (e.g., immunizations, cancer, etc.) Data sources needed for validation of requestor	
<b>Predecessor</b>	<p><b>Business Relationship Management</b> <b>Receive Inbound Transaction</b> – inquiry or contributing data</p> <p><b>Manage Provider Communications</b>– inquiry or contributing data</p> <p><b>Develop Agency Goals and Objectives</b> – requests for information</p>	
<b>Successor</b>	<p><b>Manage Provider Communications</b></p> <p><b>Manage Contractor Communications</b></p> <p><b>Develop Agency Goals and Objectives</b></p>	
<b>Constraints</b>	State and Federal regulations regarding entities authorized to access registry information	Missing data elements.
<b>Failures</b>	Requester is not authorized to access Registry	

	Data updates cannot be applied because record cannot be found	
<b>Performance Measures</b>	<p>Examples of Measures:</p> <ol style="list-style-type: none"> <li>1. Time to complete registry update = __days</li> <li>2. Successful delivery rate of responses = __%</li> </ol>	VA does not have any formal performance measures for this process.
