

## Requirements Traceability Matrix Instructions

The Requirements Traceability Matrix (RTM) is used to document and track the project requirements from the proposal through the CMS Certification process.. The Contractor is responsible for maintaining the set of Baseline Requirements directly related to the configuration of the MES components. Additions, modifications, and deletions to these requirements post contract award shall be added and modified timely, with DMAS approval and a current version of the matrix shall be maintained at all times. The Contractor shall provide an initial RTM as part of its proposal per the instructions below. The RTM will be maintained in Excel format until or unless DMAS approves an alternate format.

Column	Instructions
Requirement ID	The unique identifier for the requirement as assigned by DMAS. <b>This column shall not be modified by the Bidder.</b>
Requirement	The statement of the requirement to which the Bidder must respond. <b>This column shall not be modified by the Bidder.</b>
Compliant?	The Bidder shall indicate "Y" (Yes) or "N" (No) as to whether their solution is compliant with the requirement.
Availability	The Contractor shall indicate one of the following:
	A = Functionality is currently operational
	B = Functionality is planned
	C = Functionality is not currently planned
Date	For Availability code "B" bidder shall provide the planned availability date
Proposal Mapping	The Bidder shall provide cross-reference to the location(s) of where compliance with each requirement is described in their proposal.

<b>Technology Standards Requirements</b>					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-TECH-STND-001	All the artifacts developed as part of the proposed solution shall be compliant with the CMS and HIPAA standards and requirements.				
FMS-TECH-STND-002	The Solution shall use rules based, table driven modular, and reusable components.				
FMS-TECH-STND-003	The Solution shall facilitate online, browser based Web capabilities with no client component download(s) for all authorized end users including, but not limited to providers and members.				
FMS-TECH-STND-004	The Solution shall support functionality to interface with multiple entities outside the MES for exchange of information.				
FMS-TECH-STND-005	The Solution shall comply with all current and future HIPAA standard Transactions and Code Sets (TCS) in place or mandated by the Commonwealth and CMS.				
FMS-TECH-STND-006	The Solution shall implement standard policies and practices to ensure the security and integrity of the information to be exchanged.				
FMS-TECH-STND-007	The Solution shall provide notification to the ISS Contractor of all changes to application program interface (API) on a timely basis.				
FMS-TECH-STND-008	The Solution shall provide standard and ad hoc reporting capabilities for all modules of the proposed solution which are accessed by Department end users and other stakeholders.

<b>Technology Standards Requirements</b>					
<b>Requirement ID</b>	<b>Requirement</b>	<b>Compliant?</b>	<b>Availability</b>	<b>Date</b>	<b>Proposal Mapping</b>
FMS-TECH-STND-009	The Solution shall meet the Federal reporting requirements and performance standards as defined by CMS and the CMS certification checklists.				
FMS-TECH-STND-010	The Solution shall implement and support a reporting repository with Web based access by authorized end users, including the ability to extract data to be used with desktop applications.				
FMS-TECH-STND-011	The Solution shall provide interoperability between the modules of the proposed solution and Commonwealth imaging and document management systems. All Commonwealth documents and images on any media type received or disseminated shall be accessible, stored, and indexed on the Enterprise Content Management system.				
FMS-TECH-STND-012	The Solution shall allow users to select among several format types (e.g., PDF, Microsoft Excel, Microsoft Word) for any outputs produced. The output media types shall be role based or by individual end user(s).				
FMS-TECH-STND-013	The Solution shall implement relevant standards including, but not limited to NIEM, CAQH-CORE, HL7, and HIPAA for data interchange.

<b>Technology Standards Requirements</b>					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-TECH-STND-014	The Solution shall provide single sign-on (SSO) capability using Commonwealth standards for login and authentication. The Contractor's system shall include an end user authentication process that permits the end user to enter one (1) name and password to access multiple applications. This process authenticates the user for those applications they have access rights to and eliminates the need for further prompts when switching between applications during a session.				
FMS-TECH-STND-015	The Solution shall process all inbound and outbound files at a frequency as defined by the Department.				
FMS-TECH-STND-016	The Solution shall support and monitor the processing of all transaction files and notify the Department of all transactions which have not been processed successfully.				
FMS-TECH-STND-017	The Solution shall accept and apply interface data accurately 100% of the time.				
FMS-TECH-STND-018	The Solution shall reconcile errors identified during the processing of any transaction file and reprocess partner transactions within the agreed upon SLA.				
FMS-TECH-STND-019	The Solution shall comply with Commonwealth and Federal records management policies and retention schedules.				
FMS-TECH-STND-020	The Solution shall ensure archived data is retrievable, formatted to match the original intake document, and shows the changes during processing.

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-PROJ-DDI-004	For any milestones or deliverables which are missed or projected to be missed, the Contractor shall provide a Corrective Action Plan (CAP) that includes the following information: <ul style="list-style-type: none"> <li>▪Root cause</li> <li>▪Impact on schedule, scope and costs</li> <li>▪Milestone recovery strategy</li> <li>▪Milestone recovery date</li> <li>▪Project recovery strategy</li> <li>▪Project recovery date</li> </ul>				
FMS-PROJ-DDI-005	The Contractor shall follow the DDI Change Management process agreed to by DMAS. An Enterprise Change Management process shall be established by the ISS Contractor and Program Management Office along with Contractor input to address scope, schedule, or cost changes.				
FMS-PROJ-DDI-006	The Contractor shall conduct detailed design and joint application requirement meetings with Department staff, other impacted MES solution contractors, and ISS Contractor staff to produce a detailed specification design document for development, configuration, testing, and implementation.				
FMS-PROJ-DDI-007	The Contractor shall provide a revised work breakdown structure from the original submission, which includes the Department project team and ISS Contractor activities (provided by the ISS Contractor) and any other impacted MES contractors which have been mutually agreed-upon dependencies for DMAS approval.				

## Major Milestones and Deliverables Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-PROJ-DDI-008	The Contractor shall provide a Project Manager (PM) with the Key Staff requirements and agrees to replace the PM only if necessary, and with someone possessing equally or more qualified skills and experience, as approved by the agency.				
FMS-PROJ-DDI-009	The Contractor shall entertain baseline changes to the COTS package and provide a method for enhancement input in lieu of customizations through a User Input group or another forum to accept product input.				
FMS-PROJ-DDI-010	The Contractor shall provide a Hardware and Equipment Acquisition Plan for the DDI.				
FMS-PROJ-DDI-011	The Contractor shall provide a Software Acquisition and Installation Plan for the DDI.				
FMS-PROJ-DDI-012	The Contractor shall provide a Risk Management Plan for the DDI.				
FMS-PROJ-DDI-013	The Contractor shall provide a Quality Management Plan for the DDI.				
FMS-PROJ-DDI-014	The Contractor shall provide an Implementation and Transition Plan for the DDI which is coordinated with Department staff, and possibly other dependent MES contractors.				
FMS-PROJ-DDI-015	The Contractor shall provide a Training Plan for the DDI which addresses business owner input to satisfy operational needs.				
FMS-PROJ-DDI-016	The Contractor shall conduct all DDI training in accordance with the approved DDI Training Plan.

<b>Major Milestones and Deliverables Requirements</b>					
<b>Requirement ID</b>	<b>Requirement</b>	<b>Compliant?</b>	<b>Availability</b>	<b>Date</b>	<b>Proposal Mapping</b>
FMS-PROJ-DDI-023	The Contractor shall provide a Release Management plan and milestones on an annual schedule with an approach to work with the ISS Contractor, any other impacted MES Contractor, and DMAS PMO with a desired 6-month lead time.				
FMS-PROJ-DDI-024	The Contractor shall provide a detailed project plan for each new project or release that is coordinated with the ISS Contractor, any other impacted MES Contractor, and agency PMO.				
FMS-PROJ-DDI-025	The Contractor shall provide a Resource Utilization and Acquisition plan for each new project or release including Project Management, technical support, and business support as needed.				
FMS-PROJ-DDI-026	The Contractor shall develop a Root Cause Analysis process and reporting in conjunction with the ISS Contractor for all defects discovered.				

## Major Milestones and Deliverables Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-PROJ-DDI-027	<p>The Contractor shall create a DDI Project Management Plan according to the schedule outlined in Appendix I to be approved by DMAS. The project management plan shall include:</p> <ul style="list-style-type: none"> <li>▪Quality Management Plan</li> <li>▪Scope Management Plan</li> <li>▪Requirements Management Plan</li> <li>▪Risk and Issues Management Plan</li> <li>▪Change Management Plan</li> <li>▪Configuration Management Plan</li> <li>▪Project Performance Management Summary Plan</li> <li>▪Communications Management Plan</li> <li>▪Documentation Management Plan</li> <li>▪Training Plan</li> <li>▪Disaster Recovery Plan - DDI</li> <li>▪Business Continuity Plan</li> <li>▪Turnover Plan</li> </ul>				
FMS-PROJ-DDI-028	<p>The Contractor shall develop a Project Work Breakdown Structure (WBS) to include both Contractor and DMAS milestones and tasks. An initial Work Plan, according to the schedule outlined in Appendix I, shall involve top-down planning. The work plan shall adhere to PMBOK® best practices for project management. The WBS shall include tasks, resources, deliverables, task dependencies, percent complete, planned start, planned finish, actual start, and actual finish columns. The baseline work plan shall be delivered within 60 days of contract signing unless otherwise agreed to by the Agency. The Work Plan shall be updated and presented weekly.</p>				

<b>Major Milestones and Deliverables Requirements</b>					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-PROJ-DDI-029	The Contractor's PMO shall participate in Agency Integration and Program Management Meetings.				
FMS-PROJ-DDI-030	The Contractor shall make Project Documents available online to the Agency and contractor staff including but not limited to: work plan, status reports, status meeting agenda, and minutes.				
FMS-PROJ-DDI-031	The Contractor shall develop a Project CMS Certification Plan which defines the Contractor's approach to CMS certification. It shall include processes and procedures which will be used to manage certification requirements throughout the project lifecycle. The plan shall include, but not be limited to: completing the certification checklist, complete certification phase deliverables, validate solution functionality against the checklist, and create traceable deliverables to the checklist.				
FMS-PROJ-DDI-032	The Contractor shall create documents which support certification activities.				
FMS-PROJ-DDI-033	The Contractor shall assist and participate in CMS certification visits.				
FMS-PROJ-DDI-034	The Contractor shall respond to CMS queries during and after the site visit.				
FMS-PROJ-DDI-035	The Contractor shall provide training which includes specific areas such as quality management, risk management, requirements management, overall design and development of the solution and be comprehensive enough so the Agency PMO can participate in the deliverable production and review process.

<b>Testing Requirements</b>					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-TEST-034	The Test Management Plan shall describe the processes, procedures, and tools for problem identification and resolution.				
FMS-TEST-035	The Test Management Plan shall include templates of test progress and defect reports.				
FMS-TEST-036	The Test Management Plan shall describe how regression testing will be done at all levels when errors are corrected.				
FMS-TEST-037	The Test Management Plan shall discuss contingencies for risk mitigation and delays during the test effort.				
FMS-TEST-038	The Test Management Plan shall define procedures for notifying DMAS of problems discovered in testing, testing progress, and adherence to the test schedule.				
FMS-TEST-039	The Test Management Plan shall include a strategy for enhancing system performance based on findings obtained during test activities.				
FMS-TEST-040	The Test Management Plan shall include a description of the process used for the identification and preparation of data required for the System Integration Test effort, including a description of the use of converted data during test.				
FMS-TEST-041	The Test Management Plan shall describe the process employed for security testing, including compliance for handling of PII and PHI.

<b>Testing Requirements</b>					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-TEST-042	The Test Management Plan shall include a description of entry criteria and prerequisites to the System Integration Test effort.				
FMS-TEST-043	The Test Management Plan shall define the exit criteria which, when met and approved by DMAS, provide evidence of the completion of the System Integration Test effort.				
FMS-TEST-044	The Contractor shall provide a walk-through of the Test Management Plan before submitting to DMAS for approval.				
FMS-TEST-045	The Contractor shall submit the Test Management Plan for DMAS review and approval.				
FMS-TEST-046	The Test Management Plan shall describe how the Contractor will work with DMAS and MES QA Contractor to develop the Acceptance Test Plan and Test Cases.				
FMS-TEST-047	The Test Management Plan shall define how defect tracking is used to identify organizational or procedural weaknesses and track the resulting corrective actions.				
FMS-TEST-048	The Test Management Plan shall describe how services that execute on the Enterprise Service Bus (ESB) are unit, integration, and SIT tested.				
FMS-TEST-049	The Test Management Plan shall describe how message-oriented interactions is accomplished.

<b>Testing Requirements</b>					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-TEST-050	Test Management Plan shall describe the Contractor's organizational structure and how the testing function is managed.				
FMS-TEST-051	The Test Management Plan shall describe the Contractor support that is assigned and provided to DMAS and Contractor staff for each testing phase.				
FMS-TEST-052	The Test Management Plan shall address the division of responsibilities between the Contractor, DMAS, and MES QA Contractor.				
FMS-TEST-053	The Test Management Plan shall describe how the Contractor maintains the test environments; including loading test data routinely used by the system to perform its automated processes (e.g., reference values such as system parameters, system lists, reference tables, edits, dispositions, and security tables).				
FMS-TEST-054	The Test Management Plan shall provide a testing methodology and approach on how the Contractor will test and verify conversion data and files.				
FMS-TEST-055	The Test Management Plan shall define how defects and other issues reported by DMAS are analyzed, tracked, resolved; how required system changes implemented; and how testing is integrated with other project phases.				
FMS-TEST-056	The Test Management Plan shall describe how the testing methodology accommodates workflow testing.

<b>Audit Support Requirements</b>					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-AUDIT-001	The Contractor shall provide DMAS, at a minimum, an annual report from its external auditor on effectiveness of internal controls. If the report discloses deficiencies in internal controls, the Contractor shall include management's corrective action plans to remediate the deficiency. The report shall be compliant with the AICPA Statement on Standards for Attestation Engagements (SSAE) No. 16, Reporting on Controls at a Service Organization, Service Organization Controls (SOC) 2, Type 2 Report.				
FMS-AUDIT-002	The Contractor, and each of its third-party service providers which provide a service that may impact the financial or program operations of DMAS, shall provide the SSAE 16 SOC 2 reports for its respective entity. The SSAE 16 audit reports shall be provided to DMAS's Internal Audit Division annually, no later than 30 days after the report is issued to the Contractor.				
FMS-AUDIT-003	The Contractor shall provide DMAS, at a minimum, an annual report from a qualified, independent, external IT security Contractor for a Vulnerability Assessment and Network Penetration Test covering all Contractor and subcontractor networks that will access Commonwealth data and information.

<b>Audit Support Requirements</b>					
<b>Requirement ID</b>	<b>Requirement</b>	<b>Compliant?</b>	<b>Availability</b>	<b>Date</b>	<b>Proposal Mapping</b>
FMS-AUDIT-017	The Contractor shall conduct and document a risk assessment of each IT system classified as sensitive at least once every three years. The risk analysis shall address all of the requirements in the Security Standard and include an analysis of encryption/decryption mechanisms pertaining to PHI data at rest or in transition. (SEC 501.9 Section 6.2).				
FMS-AUDIT-018	The Contractor shall maintain and document a system for Risk Management which is compliant with the COV IT Risk Management Standard (SEC 520-00 or latest) published by VITA. The intent of this requirement is to ensure the Contractor establishes a risk management framework, setting a baseline for information risk management activities for the Contractor. These risk management activities include, but are not limited to, any regulatory requirements that the Contractor is subject to, information security best practices, and the requirements defined in this Standard. These risk management activities will provide identification of sensitive system risks, their associated business impact, and a remediation/recommendation strategy that will help mitigate risks to the Contractor's information systems and data and the Commonwealth's information systems and data. The Risk Management Framework aligns with the methods set forth by the National Institute of Standards and Technology (NIST) Framework for Improving Critical Infrastructure Cybersecurity.

## Seven Conditions and Standards Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-SCS-004	<p>Industry Standard Condition - The Contractor shall ensure alignment with, and incorporation of, industry standards, including but not limited to: the Health Insurance Portability and Accountability Act of 1996 (HIPAA) security, privacy and transaction standards; accessibility standards established under section 508 of the Rehabilitation Act, or standards that provide greater accessibility for individuals with disabilities, and compliance with Federal Civil Rights laws; standards adopted by the Secretary under section 1104 of the Affordable Care Act; and standards and protocols adopted by the Secretary under section 1561 of the Affordable Care Act. The Contractor shall describe and provide examples of how the solution provides the following capabilities:</p> <ul style="list-style-type: none"> <li>▪Inclusion of industry standards</li> <li>▪Incorporation of industry standards in requirements, development, and testing phases</li> </ul>				
FMS-SCS-005	<p>Leverage Condition - The Contractor shall work with DMAS to promote implementation of COTS packages or SaaS, and share, leverage, and identify possibilities for reuse of Medicaid technologies and systems within and among States, including but not limited to:</p> <ul style="list-style-type: none"> <li>▪Multi-state efforts</li> <li>▪Availability for reuse</li> <li>▪Identification of open source, cloud-based, and commercial products</li> <li>▪Customization</li> <li>▪Transition and retirement plans</li> </ul>				

## Seven Conditions and Standards Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-SCS-006	<p>Business Results Condition - The Contractor shall support accurate and timely processing of claims, assignment of member eligibility benefits, adjudications, and effective communications with providers, members, and the public. The Contractor shall provide examples of how its solution accomplishes this condition, including but not limited to:</p> <ul style="list-style-type: none"> <li>▪Degree of automation</li> <li>▪Web-based Customer Service</li> <li>▪Performance standards and testing</li> </ul>				
FMS-SCS-007	<p>Reporting Condition - The Contractor's solution shall produce transaction data, reports, and performance information that contribute to program evaluation, continuous improvement in business operations, transparency, and accountability. The Contractor shall provide examples of meeting this requirement including, but not limited to:</p> <ul style="list-style-type: none"> <li>▪Accurate data</li> <li>▪Interfaces with designated federal repositories or hubs</li> <li>▪Automatic generation of reports</li> <li>▪Audit trails</li> </ul>				

## Seven Conditions and Standards Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-SCS-008	<p>Interoperability Condition - The Contractor’s solution shall provide seamless coordination and integration with appropriate exchanges including but not limited to HIE and HIX, and any run by the state or federal government, and allow interoperability with health information exchanges, public health agencies, human services programs, and community organizations providing outreach and enrollment assistance services. The Contractor shall describe and present examples of how the solution provides the following capabilities:</p> <ul style="list-style-type: none"> <li>▪Interactions with exchanges</li> <li>▪Interactions with other entities</li> <li>▪Use standard messaging, protocols and architecture</li> </ul>

## MES SSO Global Security Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-MES-SSO-GLBL-001	The Contractor shall provide a detailed integration, implementation plan on how the solution shall integrate with a central SSO using its web services.				
FMS-MES-SSO-GLBL-002	The Contractor shall provide a detailed plan on the implementation of authorization system's workflow to set up user roles/access levels.				
FMS-MES-SSO-GLBL-003	The Contractor shall provide an authorization solution that shall support the MES SSO concept.				
FMS-MES-SSO-GLBL-004	The Contractor shall provide a coordination effort plan, detailing the efforts required between role-based contractor solutions that include DMAS user roles and the central SSO during implementation/setup of access control components.				
FMS-MES-SSO-GLBL-005	The Contractor shall provide an integration and implementation plan that requires coordination between role-based contractor solutions that include DMAS roles and the central SSO for external testing.				
FMS-MES-SSO-GLBL-006	The Contractor shall provide the coordination and support plans during the mapping of current roles (such as mainframe MMIS ACF2 roles) into applicable contractor solution roles for DMAS users.				
FMS-MES-SSO-GLBL-007	The Contractor shall implement a solution's role-based security and its audit capability relative to the SSO.				
FMS-MES-SSO-GLBL-008	The Contractor shall keep the user role/access level identifiers in synch with the authorization system.

<b>Rules Engine Requirements</b>					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-RULE-EGN-001	The Contractor's Rules Engine shall meet MITA 3.0 standards by using COTS Business Rules Engine products using BPMN and BPEL methodologies.				
FMS-RULE-EGN-002	The Contractor's Rules Engine shall allow integration with Identity Access Management products for several elevated user levels for business rules approvals.				
FMS-RULE-EGN-003	The Contractor's provided workflow shall automate details for any rules creation/modification/deletion and scheduled auto deployment shall be explained.				
FMS-RULE-EGN-004	The Contractor's Rules Engine shall provide a testing environment with dashboard drill downs using past production data to show how functionality/end result will change by the rule changes. This can be displayed in the dashboard by a graphical and columnar view for easy impact assessment by the business user.				
FMS-RULE-EGN-005	The Contractor shall provide a Rules Engine Business Dictionary which includes data elements, definition, data size, meaning, description and its usage.				
FMS-RULE-EGN-006	The Contractor's Rules Engine shall allow changes to be made to the valid values without bringing down the rules engine.				
FMS-RULE-EGN-007	The Contractor's Rules Engine shall have tracking mechanisms to identify which rules are executed for the particular transactions.				
FMS-RULE-EGN-008	The Contractor's Rules Engine shall be able to produce a report on rules passed or failed for all transactions.				
FMS-RULE-EGN-009	The Contractor's Rules Engine shall send alerts to the appropriate resource if there is any issue in the rules engine.

## Conversion Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-DATA-CON-033	The Conversion Plan shall identify whether data availability and use shall be limited during the conversion process.				
FMS-DATA-CON-034	The Conversion Plan shall describe security and privacy controls required for the conversion process.				
FMS-DATA-CON-035	The Conversion Plan shall describe the disposition of obsolete or unused data that is not converted.				
FMS-DATA-CON-036	The Conversion Plan shall identify a retention policy for the non-converted data in case of fallback with a need to rerun the conversion process.				
FMS-DATA-CON-037	The Contractor shall submit the Conversion Plan for DMAS review and approval.				
FMS-DATA-CON-038	The Contractor shall provide a walk-through of the Conversion Plan before submitting to DMAS for approval.				
FMS-DATA-CON-039	The Contractor shall document any revised procedures in the Conversion Plan.				
FMS-DATA-CON-040	The Contractor shall execute the approved Conversion Plan according to the project schedule.				
FMS-DATA-CON-041	The Contractor shall convert all historical and transactional data stores that are needed by and applicable to the solution.				
FMS-DATA-CON-042	The Contractor shall convert all images and other document types that are needed by and applicable to the solution.				
FMS-DATA-CON-043	The Contractor shall store and manage specified historical data covering a specified time.				
FMS-DATA-CON-044	The Contractor shall provide hardware, software, and data support for the Department during all phases of conversion.

<b>Disaster Recovery Requirements</b>					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-NFR-DR-001	The Contractor shall prepare and submit for Department approval a comprehensive Disaster Recovery Plan due to the Department on an annual basis and after a substantive change to the FMS that would require revision to the DR Plan.				
FMS-NFR-DR-002	The Contractor shall provide back-up processing capability at a remote site from the primary site such that normal FMS processing can continue in the event of a disaster or major hardware problem at the primary site. All operations at the remote back-up site will meet established contractual performance and SLA requirements.				
FMS-NFR-DR-003	The Contractor shall coordinate with and demonstrate to the Department the Contractor's disaster recovery capabilities in accordance with SLAs. The Contractor will include recovery of any new functionality implemented during the previous year.				
FMS-NFR-DR-004	The Contractor shall, in the event of a catastrophic (i.e. possibility of crimes, terrorism, hackers, intentional torts, human error, virus, etc.) or natural disaster, resume normal operational business functions at the earliest possible time in accordance with specified SLAs and according to the Department-approved disaster recovery plan.				
FMS-NFR-DR-005	The Contractor shall, in the event of other disasters caused by such things as criminal acts, human error, malfunctioning equipment, computer viruses, or electrical supply, resume normal business functioning at the earliest possible time, in accordance with SLAs.

<b>Disaster Recovery Requirements</b>					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
FMS-NFR-DR-006	The Contractor shall plan and coordinate disaster recovery activities with Department-approved business partners.				
FMS-NFR-DR-007	The Contractor shall coordinate with and demonstrate to the Department the Business Continuity and Contingency Plan every calendar year in conjunction with the annual disaster recovery demonstration.				
FMS-NFR-DR-008	The Contractor shall leverage and use the LAST environment as the Disaster Recovery site for the FMS. The extent to which the primary site cannot be restored in accordance with SLAs, may determine that the recovery site be considered the new primary site.				
FMS-NFR-DR-009	The Contractor shall, upon notification by DMAS that the primary production site is deemed inoperable, execute the Disaster Recovery Plan.				
FMS-NFR-DR-010	The Contractor shall provide back-up network connectivity at both the primary Production and Disaster Recovery sites with the capacity to support FMS and its components.				
FMS-NFR-DR-011	The Contractor shall ensure that the DRP is available to Commonwealth and Federal auditors at all times.				
FMS-NFR-DR-012	The Contractor shall establish, in cooperation with DMAS a hierarchy of critical services and infrastructure to determine the order that services will be restored.				
FMS-NFR-DR-013	The Contractor shall maintain a DRP that provides for the recovery of critical FMS services in accordance with SLAs upon the discovery of the service disruption, the declaration of a disaster or FMS Production site becoming unsafe or inoperable.

<b>Disaster Recovery Requirements</b>					
<b>Requirement ID</b>	<b>Requirement</b>	<b>Compliant?</b>	<b>Availability</b>	<b>Date</b>	<b>Proposal Mapping</b>
FMS-NFR-DR-014	The Contractor shall maintain or otherwise arrange for a disaster recovery site for its system operations in the event of a disaster that renders the FMS Production site inoperable.				
FMS-NFR-DR-015	The Contractor shall modify the DRP, software installation procedures, and operational procedures as needed to reflect the changes implemented with new data sources, system changes, or any enhancements that will impact the disaster recovery capability.				
FMS-NFR-DR-016	The Contractor shall perform an annual review of the disaster recovery back-up site, procedures for all off-site storage and validation of security procedures.				
FMS-NFR-DR-017	The availability schedules and corresponding SLAs for the Production FMS shall apply to the disaster recovery environment when fulfilling the Production role.				
FMS-NFR-DR-018	The Contractor's DRP test shall be performed, each year at no additional cost to DMAS. In the event the Contractor's test is deemed by HHS to be unsuccessful, the Contractor shall continue to perform the test at its expense until satisfactory results are received and approved by DMAS.				
FMS-NFR-DR-019	The Contractor shall develop, maintain, and submit to DMAS, in advance, all proposed off-site procedures, locations, and protocols for DMAS review and approval prior to implementation. The Contractor shall incorporate these items as components of the Disaster Recovery Plan (DRP).
