

Requirements Traceability Matrix Instructions

The Requirements Traceability Matrix (RTM) is used to document and track the project requirements from the proposal through the CMS Certification process.. The Contractor is responsible for maintaining the set of Baseline Requirements directly related to the configuration of the MES components. Additions, modifications, and deletions to these requirements post contract award shall be added and modified timely, with DMAS approval and a current version of the matrix shall be maintained at all times. The Contractor shall provide an initial RTM as part of its proposal per the instructions below. The RTM will be maintained in Excel format until or unless DMAS approves an alternate format.

Column	Instructions
Requirement ID	The unique identifier for the requirement as assigned by DMAS. This column shall not be modified by the Bidder.
Requirement	The statement of the requirement to which the Bidder must respond. This column shall not be modified by the Bidder.
Compliant?	The Bidder shall indicate "Y" (Yes) or "N" (No) as to whether their solution is compliant with the requirement.
Availability	The Contractor shall indicate one of the following: A = Functionality is currently operational B = Functionality is planned
Date	For Availability code "B" bidder shall provide the planned availability date
Proposal Mapping	The Bidder shall provide cross-reference to the location(s) of where compliance with each requirement is described in their proposal.

Technology Standards Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-TECH-STND-001	All the artifacts developed as part of the proposed Solution shall be compliant with the CMS and HIPAA standards and requirements.				
ISS-TECH-STND-002	The Solution shall use rules based, table driven modular, and reusable components.				
ISS-TECH-STND-003	The Solution shall facilitate online, browser based web capabilities with no client component download(s) for all authorized end users including, but not limited to providers and members.				
ISS-TECH-STND-004	The Solution shall support functionality to interface with multiple entities outside the MES for exchange of information.				
ISS-TECH-STND-005	The Solution shall comply with all current and future HIPAA standard Transactions and Code Sets (TCS) in place or mandated by the Commonwealth and CMS.				
ISS-TECH-STND-006	The Solution shall implement standard policies and practices to ensure the security and integrity of the information to be exchanged.				
ISS-TECH-STND-007	The Solution shall provide notification to the ISS Contractor of all changes to application program interface (API) on a timely basis.				
ISS-TECH-STND-008	The Solution shall provide standard and ad hoc reporting capabilities for all modules of the proposed solution which are accessed by Commonwealth end users and other stakeholders.				
ISS-TECH-STND-009	The Solution shall meet the Federal reporting requirements and performance standards as defined by CMS and the CMS certification checklists.

Technology Standards Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-TECH-STND-010	The Solution shall implement and support a reporting repository with Web based access by authorized end users, including the ability to extract data to be used with desktop applications.				
ISS-TECH-STND-011	The Solution shall provide interoperability between the modules of the proposed solution and Commonwealth imaging and document management systems. All Commonwealth documents and images on any media type received or disseminated shall be accessible, stored, and indexed on the Enterprise Content Management system.				
ISS-TECH-STND-012	The Solution shall allow users to select among several format types (e.g., PDF, Microsoft Excel, Microsoft Word) for any outputs produced. The output media types shall be role based or by individual end user(s).				
ISS-TECH-STND-013	The Solution shall implement relevant standards including, but not limited to NIEM, CAQH-CORE, HL7, and HIPAA for data interchange.				
ISS-TECH-STND-014	The Solution shall provide Single Sign-On (SSO) capability using Commonwealth standards for login and authentication. The Contractor's system shall include an end user authentication process that permits the end user to enter one (1) name and password to access multiple applications. This process authenticates the user for those applications they have access rights to and eliminates the need for further prompts when switching between applications during a session.				
ISS-TECH-STND-015	The Solution shall process all inbound and outbound files at a frequency as defined by the Department.

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-TECH-STND-016	The Solution shall support and monitor the processing of all transaction files and notify the Department of all transactions which have not been processed successfully.				
ISS-TECH-STND-017	The Solution shall accept and apply interface data accurately 100% of the time.				
ISS-TECH-STND-018	The Solution shall reconcile errors identified during the processing of any transaction file and reprocess partner transactions within the agreed upon SLA.				
ISS-TECH-STND-019	The Solution shall comply with Commonwealth and Federal records management policies and retention schedules.				
ISS-TECH-STND-020	The Solution shall ensure archived data is retrievable, formatted to match the original intake document, and shows the changes during processing.				
ISS-TECH-STND-021	The Solution shall comply with all Commonwealth and Federal laws, grant requirements, rules, regulations, guidelines, policies, and procedures for destruction of records.				
ISS-TECH-STND-022	The Solution shall retain all records for both paper and electronic claims as per the Commonwealth and Federal guidelines.				
ISS-TECH-STND-023	The Solution shall comply with and align with Commonwealth Technology Standards.

ICAM Solution Technical Functionality Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-ICAM-011	Contractor's Solution shall provide provisioning (onboarding) workflows with tracking.				
ISS-ICAM-012	Contractor's Solution shall support compliance reporting utilizing workflows with tracking.				
ISS-ICAM-013	Contractor's Solution shall provide an integrated security workflow solution. Additionally, Contractor shall provide details about how well the proposed Solution integrates with SharePoint.				
ISS-ICAM-014	Contractor's Solution shall provide analytics and metrics available for system logs and workflow statistics.				
ISS-ICAM-015	Contractor's Solution shall provide IT audit monitoring and reporting.				
ISS-ICAM-016	Contractor's Solution shall provide regulation support like HIPAA, Sarbanes-Oxley (SOX), etc.				
ISS-ICAM-017	Contractor's Solution shall provide a process for the conversion of existing agency accounts to new system roles.				
ISS-ICAM-018	Contractor's Solution shall include Audit Policy enforcement.				
ISS-ICAM-019	Contractor's Solution shall provide Role based support (i.e., roles can be delegated to other personnel with respect to date ranges and/or organizational role demands). These privileges for a role could be changed on an as needed basis and all the role-based delegation and supervisor role changes shall be audit trailed with date and time stamp logs to show the historical changes.				
ISS-ICAM-020	Contractor's Solution shall support Federation of user access rights on web applications across otherwise untrusted networks.

ICAM Solution Technical Functionality Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-ICAM-021	Contractor shall provide a back-end database solution approved by DMAS for storage of all transaction, access, audit critical access logs, and other essential data that will need to be retained as per security regulations.				
ISS-ICAM-022	Contractor's Solution shall provision all agency supervisors to monitor and manage security roles of their direct reports, including request for granting and revoking access. DMAS management hierarchy definition maintained by DMAS Office of Compliance and Security (OCS) shall be captured by the ICAM Solution.				
ISS-ICAM-023	Contractor's Solution shall provide proxy capabilities for substituting supervisor's responsibilities.				
ISS-ICAM-024	Contractor's Solution shall provide a Secure Token Server (STS), which has a mechanism to generate several types of token types based on security frameworks, including but not limited to: SAML, OAuth, WS Security, and encrypted tokens based on user categories.				
ISS-ICAM-025	Contractor's Solution provided STS shall have a mechanism to generate tokens that shall expire with a hard and soft timeouts.				
ISS-ICAM-026	Contractor's Solution shall provide a mechanism to generate and store public and private keys for encryption and decryption of data through a Portal User Interface (UI).				
ISS-ICAM-027	Contractor's Solution shall provide a mechanism to override the existing private and public key combination on an encrypted data store by an authorized system administrator to mitigate risks caused by ransomware or other security breaches.

ICAM Solution Technical Functionality Requirements					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-ICAM-028	Contractor's Solution shall provide a mechanism to mandate a change of private keys, public keys, and passwords beyond a certain period of days. This setting should have the capability to be configured through the Portal UI by system administrators based on various user levels, entitlements, and application access.				
ISS-ICAM-029	Contractor's Solution shall provide a mechanism for Multi Factor Authentication (MFA) for all users, with a minimum of 2 levels up to 4 levels based on the user access level. A sample scenario would be a member can have 2-factor authentication, user-provisioning approver shall have 3 levels of authentication, while a system administrator shall have 4 levels of authentication.				
ISS-ICAM-030	Contractor's Solution shall provide a UI functionality where various applications integrated or communicating with ICAM Solution shall be provisioned.				
ISS-ICAM-031	Contractor's Solution shall provide a UI functionality where various user roles and entitlements can be individually provisioned with respect to the applications.				
ISS-ICAM-032	Contractor's Solution shall provide a mechanism to authenticate the identity and allow access based on entitlements by encrypting the details in the token generated.				
ISS-ICAM-033	Contractor's Solution shall provide a mechanism to validate the security token expiration and entitlements when requested by other systems, and it shall return a status of this credential. This is critical as an already logged in user may have been idle for a while and it is the responsibility of the application to make a call to the ICAM Solution to determine the security token validity before fulfilling the request.

ICAM Solution Technical Functionality Requirements					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-ICAM-034	Contractor's Solution shall provide a mechanism to immediately terminate a security token on suspicious activity based on in built security algorithms and patterns. This activity needs to be reported to the security team for further investigation to rule out false positives.				
ISS-ICAM-035	Contractor's Solution shall provide the functionality to enable ad-hoc response to SSO validation status check request that come from other systems.				
ISS-ICAM-036	Contractor's Solution shall provide a secure encrypted storage of credential information.				
ISS-ICAM-037	Contractor's Solution shall provide a reporting dashboard, which will display reports, transaction logs, audit logs, etc. for a particular user or a group.				
ISS-ICAM-038	Contractor's Solution shall provide Business Process Management with a Business Rules Engine to provide quick creation of workflow processes on user, groups, or application provisioning.				
ISS-ICAM-039	Contractor's Solution shall provide a workflow mechanism, which will allow the user provisioning process to be automated once the registration is completed.				
ISS-ICAM-040	Contractor's Solution shall provide an immediate workflow approval process for less risk users (e.g., guest members or internal users requesting limited access) based on system algorithms to avoid delay in manual intervention.				
ISS-ICAM-041	Contractor's Solution shall provide an optional functionality for ICAM Solution to be easily integrated with other enterprise-wide systems like EDI, EMR, ECM, ITSM Change management tools, etc. by non-cumbersome configuration changes.

Rules Engine Requirements					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-RULE-EGN-001	The Contractor's Rules Engine shall meet MITA 3.0 standards by using COTS Business Rules Engine products using BPMN and BPEL methodologies.				
ISS-RULE-EGN-002	The Contractor's Rules Engine shall allow integration with Identity Access Management products for several elevated user levels for business rules approvals.				
ISS-RULE-EGN-003	The Contractor's provided workflow shall automate details for any rules creation/modification/deletion and scheduled auto deployment shall be explained.				
ISS-RULE-EGN-004	The Contractor's Rules Engine shall provide a testing environment with dashboard drill downs using past production data to show how functionality/end result will change by the rule changes. This can be displayed in the dashboard by a graphical and columnar view for easy impact assessment by the business user.				
ISS-RULE-EGN-005	The Contractor shall provide a Rules Engine Business Dictionary which includes data elements, definition, data size, meaning, description and its usage.				
ISS-RULE-EGN-006	The Contractor's Rules Engine shall allow changes to be made to the valid values without bringing down the rules engine.				
ISS-RULE-EGN-007	The Contractor's Rules Engine shall have tracking mechanisms to identify which rules are executed for the particular transactions.				
ISS-RULE-EGN-008	The Contractor's Rules Engine shall be able to produce a report on rules passed or failed for all transactions.				
ISS-RULE-EGN-009	The Contractor's Rules Engine shall send alerts to the appropriate resource if there is any issue in the rules engine.				
ISS-RULE-EGN-010	The Contractor's Rules Engine shall allow logging to be turned ON or OFF.

ISS Functional Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-FUNC-027	The ISS Contractor’s solution shall support flexibility for upgrades or replacement components in the future, and be capable of exposing system components for use by other State agencies or other entities.				
ISS-FUNC-028	The ISS Contractor shall support multiple industry standards, including, but not limited to, IBM MQ, XML, XSLT, JCA, J2EE, and .NET technologies.				
ISS-FUNC-029	The ISS Contractor shall provide the capability to create a business process from an existing Services inventory within a timeframe approved by the Department.				
ISS-FUNC-030	The ISS Contractor shall provide the capability to invoke a Service locally or remotely within a timeframe approved by the Department.				
ISS-FUNC-031	The ISS Contractor shall provide the capability to invoke Services in a variety of protocols. The choice of protocol must not restrict the behavior of the Service. (Binding to a specific protocol takes place at run-time/deployment-time, not at design or development).				
ISS-FUNC-032	The ISS Contractor shall provide the capability to participate in a message queuing system feature using industry standard specifications for messaging e.g. Simple Object Access Protocol (SOAP).				
ISS-FUNC-033	The ISS Contractor shall provide the capability to meet future MITA or other external architecture requirements.				
ISS-FUNC-034	The ISS Contractor shall provide the capability to mask differences among underlying platforms, software architectures, and network protocols.

Disaster Recovery Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-NFR-DR-007	The Contractor shall coordinate with and demonstrate to the Department the Business Continuity and Contingency Plan every calendar year in conjunction with the annual disaster recovery demonstration.				
ISS-NFR-DR-008	The Contractor shall leverage and use the LAST environment as the Disaster Recovery site for the ISS. The extent to which the primary site cannot be restored in accordance with SLAs, may determine that the recovery site be considered the new primary site.				
ISS-NFR-DR-009	The Contractor shall, upon notification by DMAS that the primary production site is deemed inoperable, execute the Disaster Recovery Plan.				
ISS-NFR-DR-010	The Contractor shall provide back-up network connectivity at both the primary Production and Disaster Recovery sites with the capacity to support ISS and its components.				
ISS-NFR-DR-011	The Contractor shall ensure that the DRP is available to Commonwealth and Federal auditors at all times.				
ISS-NFR-DR-012	The Contractor shall establish, in cooperation with DMAS a hierarchy of critical services and infrastructure to determine the order that services will be restored.				
ISS-NFR-DR-013	The Contractor shall maintain a DRP that provides for the recovery of critical ISS services in accordance with SLAs upon the discovery of the service disruption, the declaration of a disaster or ISS Production site becoming unsafe or inoperable.				
ISS-NFR-DR-014	The Contractor shall maintain or otherwise arrange for a disaster recovery site for its system operations in the event of a disaster that renders the ISS Production site inoperable.

EDI Call Center Requirements					
Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-ECC-001	The Contractor shall provide a call center to assist with EDI related submission, compliance, translation, and other technical support issues and questions.				
ISS-ECC-002	The Contractor shall provide the ability to track call center inquiries from receipt to resolution.				
ISS-ECC-003	The Contractor shall provide the capability for DMAS to easily access call center logs, and call statistics.				
ISS-ECC-004	The Contractor EDI call center shall utilize all applicable existing DMAS EDI help desk phone numbers. The Contractor agrees to relinquish ownership of the toll-free numbers upon actual transfer back to DMAS or a DMAS assigned agent, at which time the Department shall take title to these telephone numbers.

Meeting Space Requirements

Requirement ID	Requirement	Compliant?	Availability	Date	Proposal Mapping
ISS-MTG-001	<p>The Contractor shall provide appropriate space to conduct meetings during the DDI phase that require DMAS staff attendance, including but not limited to JADs, walkthroughs, and team meetings. The space would ideally be within walking distance of the DMAS offices, but must be no more than 3 miles from 600 East Broad Street. Include the number of sessions, length of sessions, and capacity in your proposal. The proposed meeting space should be fully functional to ensure productivity, including but not limited to accommodate teleconferences, connectivity for WebEx meetings, projector equipment and white boards.</p>
