

## Learning Network - EPSDT Services

The Early and Periodic, Screening, Diagnosis, and Treatment (EPSDT) program is a Medicaid program for children up to the age of 21 through which health care problems are identified and treated early through:

- Regular medical, dental, vision, and hearing check-ups
- Diagnosis of problems
- Treatment of problems discovered

The goals of the EPSDT program are to keep children as healthy as possible by:

- Assuring that health concerns are diagnosed as early as possible
- Assuring that treatment is provided before problems become complex
- Assuring that medically justified services are provided to treat or correct identified problems

The Power Point® presentations are best viewed in the "Slide Show" mode. If you do not have Power Point® loaded on your computer click here [Power Point®](#) to get a copy of the Power Point® viewer. If you copy it to your computer you will need to run the program from the location where you saved it. Then open the presentation into Power Point®. You should view the slides in the "Slide Show" mode by first clicking on "Slide Show" then "View Show".
