II. Rates and Payments

A. The State assures CMS that the capitated rates will be less than the cost to the agency of providing State plan approved services to an equivalent non-enrolled population group based upon the following methodology. Please attach a description of the negotiated rate setting methodology and how the State will ensure that rates are less than the amount the state would have otherwise paid for a comparable population.

TN No. 12-0001 Approval Date 4/26/2022 Effective Date 3/22/2023

SN No. 06/06 HCFA ID:
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State of VIRGINIA

1. XX Rates are set at a percent of the amount that would otherwise be paid for a comparable population.

2. Experience-based (contractor’s/State’s cost experience or encounter date)(please describe)

3. Adjusted Community Rate (please describe)

4. Other (please describe)

The methodology develops an amount that would otherwise have been paid under the state plan (AWOP). The AWOP is developed using base period encounter data adjusted for comparable populations and services to those covered by the PACE program, specifically individuals over the age of 55 historically receiving services in an institutional setting (nursing home) or enrolled in a home and community based services (HCBS) waiver. The historical data, which is not more than three years old, is adjusted to reflect legislative modifications of payment arrangements between the data period and the contract period as well as benefit or eligibility changes occurring prior to the beginning of the contract period. The base period data is also updated to reflect expected increases in utilization and cost for the contract period covered by the rates referred to as prospective medical trend. An allowance for administrative costs is added to the AWOPs along with a provision for underwriting gain, consistent with actuarial assumptions for comparable administrative costs and underwriting gain included in capitation rates for MLTSS plans or state administrative costs for comparable FFS individuals. The final capitation rates are determined as a percentage discount (savings factor) off of the AWOP.

Rates vary by geographic region, and the state calculates two separate rates within each region: one for dual eligible participants and a rate for Medicaid-only participants.

B. The State Medicaid Agency assures that the rates were set in a reasonable and predictable manner.

C. The State will submit all capitated rates to the CMS Regional Office for prior approval, and will include the name, organizational affiliate of any actuary used, and attestation/description of the capitation rates.

III. Enrollment and Disenrollment

The State assures that there is a process in place to provide for dissemination of enrollment and disenrollment data between the State and the State Administering Agency. The State assures that it has developed and will implement procedures for the enrollment and disenrollment of participants in the State's management information system, including procedures for any adjustment to account for the difference between the estimated number of participants on which the prospective monthly payment was based and the actual number of participants in that month.
